# DC FUTURE STATE

TAKES YOU BEYOND TOMORROW

By Adam Philips

When *Dark Nights: Death Metal* #7 thunders into comics shops on January 5, it may look like the end of an epic—but this explosive final issue will include not one but two epilogues, each leading to new worlds of story.

One of these epilogues will direct readers toward a new vision of the DC Universe called Future State. But what exactly is Future State? It's an event that takes fans into the future, outside the usual confines of the Multiverse, where adventures reach beyond the scope of mere maps. It's a place where new visions of the World's Greatest Heroes wage epic battles for justice that run parallel to their older counterparts' own heroic struggles, across a variety of different time frames. Future State provides glimpses into wonders yet to come for the DC Universe—and where all the great stories from the past are real, and where all these stories count. It all matters...because they all happened.

Art by Dan Mora

## NEW HEROES RISING

On these worlds, and in these futures yet to come, a new Wonder Woman named Yara Flor emerges from the very different Amazon of South America to carry on Diana Prince's mission of peace—while Diana herself has ascended to true immortality, only to face a threat that even mighty Darkseid could not defeat. And a heralded champion of Themyscira called Nubia strikes out for a new home and a new mission in Man's World.

The Man of Steel, meanwhile, has left Earth behind. He's undertaken a dangerous mission to Warworld, the dread weaponized planetoid, where he must battle the gladiator hordes of Mongul. And while the people of Earth mourn the disappearance of one Superman, another has risen to take his place: Jonathan Kent, the new protector of Metropolis and the entire human race! To save his city from the scourge of a new, dangerous mutation of Brainiac, Jon will have to take drastic action—which will result in the creation of the Bottle City of Metropolis!

Gotham City has gone from dangerous to downright deadly, as a paramilitary organization known as the Magistrate has taken to the streets of the city—and when the mayor declares that wearing a mask is a crime in Gotham, a mysterious new Dark Knight rises to protect the public his own way! At the same time, Bruce Wayne, presumed dead by the public, must learn how his own tech was used by the Magistrate to penetrate his greatest secrets.

## HEROES WITH NEW MISSIONS

On the streets of Gotham, you'll also discover the dark plans the Magistrate is making for the illicit substance known as Lazarus Resin—and how far Tim Drake will go to keep it out of their hands! Back in uniform as Robin, he's joined by Spoiler for a heist at 20,000 feet! Plus, Harley Quinn has been captured by the Magistrate, and they're using the Scarecrow to probe her knowledge of Gotham's underworld. And Catwoman's about to pull the biggest robbery of her career by stealing a bullet train loaded with captured vigilantes—and innocent children. Nightwing has found a new headquarters in the abandoned Arkham Asylum, and he's about to get a visit from the new Batman! Gritter is back, too, and he's about to run afoul of...well, just about everyone! And two Batgirls—Stephanie Brown and Cassandra Cain—have been imprisoned by the Magistrate, but one of them may have a secret mission!

The Justice League, too, is reborn with new yet familiar heroes: Jonathan Kent as Superman, Yara Flor as Wonder Woman, Jo Muellein as Green Lantern, and Andy Curry as Aquawoman—plus a Flash from a distant corner of the Multiverse, and a Batman whose identity must remain a secret at least for now. In fact, no one on this team knows who the others are—and if they can't share their true identities, how will they ever learn to trust each other?

John Timms

## ELSEWHERE IN THE DC UNIVERSE

- Barry Allen and his fellow super-speedsters have been stripped of their powers, only to face the deadly threat of Wally West, who's been possessed by an entity that's been trapped for eons inside the Speed Force.
- Green Lantern John Stewart leads an elite team of ring-wielders beyond the farthest reaches of the 3,600 known sectors to explore new worlds—but how will they protect themselves when the Corps' Central Power Battery goes out?
- New Aquaman Jackson Hyde must fight his way out of a prison on Neptune and back home to Earth following a mission gone horribly wrong that threw both him and Andy Curry—daughter of Arthur and Mera—into the vast abyss of an ocean that spans the universe.
- At last, Amanda Waller's ultimate plan for the Suicide Squad is revealed—a plan that could doom the planet! But the team has ideas of their own...
- Following a devastating conflict, life blooms anew for the Swamp Thing—but the discovery of an errant human may force the guardian of the Green to take drastic steps to protect the planet.
- The familiar face of Shilo Norman returns as Mister Miracle, super escape artist in both *Superman of Metropolis* and *Superman: Worlds of War*—but when he catches the Boom Tube out of the Bottle City of Metropolis, he'll wind up somewhere even worse!
- The Legion of Super-Heroes takes one giant leap into the distant future—but who is left on the team? And which of them betrayed not just the United Planets but the entire galaxy?
- Titans Tower stands as a burned-out husk, a memorial to the school for young heroes that could have been. Now, the remaining New Teen Titans must turn to one of their former students—the hero known as Red X, making his comics debut—for answers.

To create these amazing stories, DC has enlisted some of our top talents as well as numerous comics newcomers. Together, they're sure to excite fans who are eager to see what's in store for DC's heroes in these stories—most of them contained in two issues that run in January and February.

But wait—we said *Dark Nights: Death Metal* #7 would have two epilogues, didn't we? No doubt you're wondering where the second epilogue will lead. Well, for that, you'll have to wait.

When Jackson Hyde accepted the mantle of Aquaman, he didn't expect to also have to mentor Andy Curry, Arthur and Mera's teen daughter. Nor did he expect that he and Andy would get sucked into the Confluence—an interdimensional nexus that connects distant planets and galaxies through the One Great Ocean. And he *certainly* didn't expect to lose Andy in the process of trying to find their way back home. Now Jackson's not sure how long he's been stuck in a prison on Neptune (five years?) or how many times he's tried to escape (200 at least!). But today Jackson saw something in the water that gave him hope for the first time in a long time—and his captors have no idea what he's got in store for them.

Before leaving for parts unknown, Clark Kent entrusted Earth's safety to his son. Now, Jonathan Kent is Superman! Top priority for this new Superman: to protect Metropolis. When a new version of Brainiac attacks, Jon takes drastic measures—which result in the Bottle City of Metropolis! But watch out, Jon, because Supergirl is on her way, and she is *not* happy with your decision.

Meanwhile, in the new bottle city, a new hero has risen. Jake Jordan, the former Manhattan Guardian, came to the City of Tomorrow to start over. But he's not the only one who wants a new beginning. An anarchist calling herself Honest Mary sees this time of trouble as an opportunity for rebirth—and she'll tear down the entire city to prove her point. Does Jake have what it takes to save his new home from disasters both inside and out of the bottle? Superman's former pal Jimmy Olsen is going to make sure he does!

Finally, the current Mister Miracle, Shilo Norman, is also in the bottle, and he's looking for a way out! He'd better be careful, though, or he may end up someplace unexpected. It's a story that continues in *Superman: Worlds of War #1*!

This monumental Future State title features four big stories! First, Clark Kent is gone, leaving a Superman-shaped hole behind. People gather in Smallville to celebrate their hero, little realizing that he is across the galaxy helping others. Superman has gone to Warworld, where he fights as a gladiator in the deadly pits of Mongul. But this is Superman we're talking about—and his idea of a victory does *not* line up with the expectations of Mongul's hordes!

Meanwhile, on the other side of Warworld, other agents are at work, struggling for a better life. Shilo Norman, the man known as Mister Miracle, has ridden a Boom Tube across the cosmos from Metropolis to find himself at odds with an entire planet!

At the same time, Midnighter, the greatest fighter from Earth, is punching his way through a whole mess of trouble. He's on the hunt for a new energy source deadlier than Kryptonite. His goal: to shut it down before it gets unleashed on an unsuspecting universe.

On top of that, the Black Racer, a girl raised in the slums of Warworld to be one of its top competitors, turns betrayal into a crusade to fight for the freedom of others like her.

Before the New Teen Titans, there were the original Teen Titans. In the tumultuous 1970s, in an America that was very different than today but in many ways all too familiar, the trials and tribulations of these young heroes were witnessed by two of DC's first Black superheroes: Karen Beecher-Duncan, better known as Bumblebee, and Mal Duncan—even if their versions of events are often at odds. And across that decade, they fought for their seats at the Titans' table while joining the battle against injustice.

The long-awaited miniseries written by Academy Award-winning screenwriter John Ridley (*12 Years a Slave*, *Let It Fall*) and beautifully illustrated by Giussepi Camuncoli and Andrea Cucchi continues to look at the mythology of the DC Universe as seen through the prism of DC Super Heroes who come from traditionally disenfranchised groups.

Harley Quinn has avoided Gotham City ever since she broke up with The Joker and found a home in Coney Island. But when she gets an offer she can't refuse, she has no choice but to slip back into the city as quietly as she can, hoping to be gone before anyone—especially her ex—learns she's been there. But for Harley, "as quietly as she can" is plenty loud...and before she can say "Holee bounty hunters, Batman," The Joker's sicced every super-villain in the city on her pretty ombré head—and the only team tough enough (or crazy enough) to come to her defense is the Birds of Prey...if they can put up with her. One of DC's most compelling characters is reborn for a new age! Since the dawn of time, the planet's safety has depended on maintaining a balance of three great powers: the Green, the force that unites all plant life; the Red, the force that unites all animal life; and the Rot, the force of death. Each generation, the Green selects an avatar to serve as its protector—the Swamp Thing. But Dr. Alec Holland, the Green's newest champion, is no longer interested in the role. The Rot's own avatar is growing stronger, and servants of decay gain more territory every day. If Alec doesn't return to his duties soon, there might not be any Green left to protect.
